

## Overnight 12 Hour 50Hz Conventional Wa Battery Charger

The operating instructions are in the following languages making it extremely user friendly:

- English
- Polish
- Latvian
- Russian

The Juice Overnight charger is a fully automatic Wa charger designed to charge your battery in 12 hours.

- Available in single or three phase.
- From 24 volt to 80 volt.

Featuring an automatic stop/start, electronic controller with failure diagnostics, equalizing charge and overload cut out on the transformer you can be assured to have maximum safety and reliability.

The front panel features an easy to read LCD display to show charging data and 5 LEDs indicating charging stages or any faults.

The charger features a green steel case with white door and with or without your choice of plug.

Prices vary depending on model.
